

This heatmap displays a 37x37 matrix. The x and y axes are both labeled from 0 to 35, with major ticks every 5 units. The color scale ranges from dark purple (low values) to yellow (high values). The matrix shows a strong diagonal band of high values, with the most intense elements (yellow) located at (15, 15), (24, 24), and (35, 35). There are also several off-diagonal elements with moderate to high values, particularly along the main diagonal and a few scattered positions.
